How to sourcing API Gauges In China?

Step 1: Professional Selling. As a strategic supplier in thread gauges, who must be professional. So they can make sure supply you the right gauges, and provide you the professional services and guide in thread areas. We are professional in selling API Gauges more than 10 years, and were trusted in most of your industries. Wish have a strategic cooperation with you in a long term.

Step 2: Manufacturers API Monogram Authorized. As a strategic supplier in API Thread Gauges, the manufactures must be authorized to use the API Monogram. Because API would like to audit the manufactures who have been authorized each cycle years, to make sure they follow up the API rules strictly when manufacture the gauges. And it is valid for you to be audit by API on your own plants. FYOU P MEC were supported by top two API Thread Gauges manufacturer in China, we can make sure all the gauges were made by the manufactures who were authorized by API.

Step 3: Calibration Certificates Traceable to NIM.

As a strategic supplier, it is basic that provide you the calibration certificates which can be traceable to NIM or NIST, when they ship the gauges to you. It is the key data for the value S, S1, S2 when you measure the parts. FYOU PMEC provide you all the API Gauges Comes with the fully parametric calibration certificates which can be traceable to NIM (National institute of Metrology, China) freely.

Step 4: Available to The Calibration Certificates issued by TGRC of CNPC.

Do Not Trust Free! If you need the third party calibration certificates, please select the most authoritative calibration institution in local. There is no free lunch in Chinese words. TGRC of CNPC is the most authoritative calibration institution in API Gauges for working gauges in China, The full name is CNPC Tubular Goods Research Institute. If you need the third party calibration certificates, FYOU PMEC will provide you the calibration certificates issued by TGRC come with the shipments.

Step 5: Traceable to NIM or NIST.

As a strategic supplier who must provide you the API Gauges traceable to NIM or NIST. How to make sure it? Ask the supplier provide you the calibration certificates show the master gauges S/N and its NIM or NIST calibration certificates, or request of the TGRI/TGRC calibration certificates, FYOU PMEC provide you all the API Thread Gauges which can be traceable to NIM or NIST.

Step 6: Short Lead Time. FYOU PMEC, As a strategic supplier, the leading gage solutions service provider, excellent in threading and gauging solutions. We **stock sale** for the complete of the Thread Gauges listed in the API Spec.5B, API Spec7-2, and API Spec11B. The lead time is about 4~5 working days when you place the order. If urgently, we can pull in continuously.

Step 7: Strong Packaging. As a strategic supplier who must package the gauges with strong way, to make sure it can reach you safety and normally by normal logistics. FYOU PMEC provide you all the API Gauges were packaged by strong wooden boxes internal and were packaged by strong paper boxes external easy to recognize.
